Statement of Purpose

The purpose of this study is to evaluate MemStone device to understand usability requirements and use.

Data Collection

We will be recording a video of you doing the test, which also includes audio.

Confidentiality and Anonymity

Information obtained about you for this study will be kept strictly private. It is stored on a server hosted on USI premises. Only project members will have access to the data. During data transfer (from device to the server) and while actively analyzing the data, your information may be temporarily stored on laptops, which use disk encryption to prevent data loss in case of theft. The recordings will be destroyed six months after the conclusion of the study.

The results of the study may be published in anonymized form for scientific purposes. These results *could* include individual quotes from you, though we would ensure that any identifiable references (dates, names, project names, places) will be anonymized/redacted before publication.
